

Dental Support

Let Nutritional Data, Inc. make a change in your health

Dental Support Products:

Bio-Dontalin
Bio-Chlor-Dox
Thymus Complex
C-1000 TR

Other Dental Support Products:

Oligo Magnesium
Oligo Vanadium
Dentotox

Custom programs are available to Dentists and their Staff

Safe and effective natural supplements & homeopathic remedies

Other Available Nutritional Programs:

Female Hormone Balance
Male Hormone Balance
Longevity/Anti-Aging/Hgh
Pain & Inflammation
Senior Health Support
Immune Support
Auto Immune Support

Detailed product information continued on the back

Gum disease is caused by plaque remaining around the gum lines of the teeth. The bacteria in plaque produce acids and other toxins that can destroy bone and gum tissue over a period of time. Plaque can be resolved by using specific digestive enzymes that live within the mouth. Many scientists believe that gum disease may also start in the blood stream. Nutritional Data gets results by covering all possible issues in one simple protocol.

Gum and Bone Disease can have the following symptoms:

- Gums bleed easily with or without brushing
- Gums are very red, tender and/or swollen
- Pus is visible in between teeth and gums when they are pressed
- Gums seem to be pulling away from your teeth
- Chronic bad breath or a bad taste in your mouth
- Noticeable change in bite or in the way your teeth fit together
- Teeth are loose or they are separating
- The fit of your partials or dentures have changed
- Pain with or without brushing
- Pain with or without chewing
- Sinus infections

PRODUCT INFORMATION

BIO-DONTALIN

INGREDIENTS (per 4 tablets): Vitamin C 800mg, Vitamin D 800 IU, Pyridoxine 8mg, Folic Acid 800mcg, Calcium 440 mg, Phosphorous 280mg, Magnesium 360mg, Zinc 28mg, Copper 4mg, GTF Chromium 280mcg, Lemon Bioflavonoids 360mg, Boron 140mcg, Vanadium 135mcg, Horsetail 80mg.

MODE OF ACTION: Strengthens the jaw, teeth and their sockets. This special formula is balanced with the right combination of vitamins, minerals, and herbs to support the entire mouth. Each ingredient plays a role in the following: infection, connective tissue, antibodies, DNA, RNA, nerve transmission, bone formation, nerve and wound healing, cavity prevention, immune response, red blood cells, sodium-potassium balance, inflammation, splits and cracks around mouth, mucous membrane healers and hardening of bones. The Bio-Dontalin ingredients work separately to achieve healing of the gums, but it is the synergy of these nutrients working together that achieve optimum results. Most patients see positive results with Bio-Dontalin in the first 2 to 4 weeks. When combined with Bio-Chlor-Dox, the concerns of infection and bleeding gums are reduced and recovery time accelerated. The 4 products on this page were designed in practice to see dramatic changes in gum, teeth and mouth conditions in 30 days or less. When taken between 3 and 6 months, most patients and their dentists see an enormous change in the overall health of teeth, gums and jaw. Dosage under normal circumstances for a standard sized adult is 2 BID (2 tablets twice a day) with meals. Dosage and time of results may vary according to circumstances and dietary habits.

BIO-CHLOR-DOX

INGREDIENTS: Homeopathic Natrum Chloratum 2x in a base of deionized water.

MODE OF ACTION: Homeopathic drops for topical and oral inflammation. Bio-Chlor-Dox helps to improve oxygen throughout the blood to help fight infection and balance pH. Helps produce nitric oxide which supports cell communication. Bio-Chlor-Dox has the following properties: Anti-Bacterial, Anti-Fungal, Anti-Parasitic, and some Anti-Viral properties. It has shown to be effective on staphylococcus and other stubborn bacteria. When used with Bio-Dontalin, bleeding and gum discomfort is reduced after 1 to 3 weeks. It has also been used to relieve the soreness in joints, yeast, fungus, sores and thrush. Bio-Chlor-Dox is considered a broad spectrum anaerobic pathogens displacer. Patients notice improved energy, circulation and immunity. Some practitioners recommend taking a probiotic with this product if the patient has existing intestinal problems or has been on antibiotics over the past 12 months. We recommend using Biodophilus Powder taken BID (twice daily) for better results. Bio-Chlor-Dox dosage under normal circumstances is 5 to 8 drops under the tongue (swish around mouth) QID (3 to 5 times a day). Dosage may vary according to circumstances.

C-1000 TR

INGREDIENTS (per tablet): Vitamin C 1000mg, Rose Hips 60mg, Rutin 25mg, Citrus Bioflavonoids 25mg, Hesperidin 25mg, Echinacea 25mg, Vitamin E 30 IU.

MODE OF ACTION: Boost immunity with C-1000. Use the natural healing powers of Vitamin C to correct skin and mucous membrane health. Vitamin C combined with certain bioflavonoids and Echinacea has a history of healing mild to severe wounds. TR means "Time Released"; that is, the supplement won't be lost through excretion. Studies have shown that most Vitamin C taken in supplement form is excreted out of our bodies in the first urination after dosage. The Echinacea mixed with Vitamin C has been effective in peritonitis, infections and inflammations. The bioflavonoids with C effectively support bones and teeth, heal and support capillary walls, and strengthen blood vessels, cartilage and ligaments. Vitamin E has been shown to help nerve conduction and protect the Vitamin C. Vitamin C has conclusively been shown effective in cases of scurvy. Scurvy may not be caught or recognized until it reaches advanced stages. Recommended dosage will vary among patients. If gums are soft or spongy, a loading dose of 2 TID (3 times a day) is needed for 30 days then 2 tablets BID (2 times a day) thereafter. Best taken after food or small snacks. Bowel tolerance may suggest dosage.

THYMUS COMPLEX

INGREDIENTS (per 2 capsules): Vitamin A 7500 IU, Vitamin C 250mg, Vitamin E 75 IU, Zinc 22mg, Copper 2 mg, Thymus Tissue* 85 mg, Spleen Tissue* 85mg, Lymph Tissue* 75mg, Bee Pollen 50mg, Maitake Mushroom 50mg, Reishi Mushroom 50mg, Shiitake Mushroom 50mg, Bone Marrow 45mg, Parotid Tissue* 45mg, Placenta Tissue* 45mg, Echinacea 30mg, Colostrum 30mg, Adrenal Tissue* 18mg.

MODE OF ACTION: Thymus Complex is a unique formula and grade of ingredients that supports the overall immune system. It directly impacts any systems of the body that may have weakened or can no longer maintain themselves. The thymus gland combines copper and fat soluble Vitamin T antibodies to fight infections. Thymus Complex helps to reverse poor wound healing in all tissues throughout the body and has been used for many years in supporting patients under high stress and weakened immune systems. When we are born our thymus gland matures during the first 2 years and becomes a primary part of our immune system. As we age, this gland shrinks for unknown reasons and starts to show a weakened immunity. Thymus Complex helps to strengthen this gland and restore immunity. In chronic cases, a standard sized adult may take 4 to 6 weeks to see results from Thymus Complex and in acute cases, results are seen in 48 to 72 hours. Acute dosage for a standard sized adult can be 2 capsules QID (4 times a day) before meals. Chronic dosage may take 2 capsules BID (twice a day) for an extended period of time. Dosage may vary according to doctor recommendation.

- All the minerals in MBI supplements are chelated with amino acids which increase uptake by 300% and provide deeper cellular penetration for a longer biological half-life.
- All Glandulars are New Zealand freeze-dried tissue processed at -5 degrees & low vacuum process which are free from heavy metals and pesticides.
- All MBI products follow Canadian Standard Regulations which are more stringent than US Regulations.
- All MBI products are manufactured per cGMP (Current Good Manufacturing Practice); rated superior to the standard GMP.

If you are presently taking a multiple vitamin while on this program, you can reduce your multiple vitamin intake by 1 less pill per day.
